

Found my long-lost Simpsonizeme Photo

September 22, 2013

Back in 2007 when *The Simpsons Movie* was released, there was also an interactive promotional site called *Simpsonizeme.com* which converted portrait photos into Simpsons-style cartoon avatars.

The site itself is *now long gone*, even though *people would still like to use it*.

So I was excited to find my own Simpsons avatar, *left*, while searching for something else in my digital archives.

Of course, I wasted no time in making it my profile photo on *Github* and *macaronics.com*.
